

ERIK NIKLI

Software Engineer

About Me

I've started programming when I was 14. Since then I've learnt many web technologies (from PHP to NodeJS). I'm more experienced in Backend Development but eager to become a Fullstack Engineer.

- Phone: +36 20 367 8820
- Email: erik200203@gmail.com
- Website: <https://github.com/niklierik>

LANGUAGE

- Hungarian (native)
- English (Intermediate)

PROGRAMMING LANGUAGES

- TypeScript
- SQL
- Java
- C#
- PHP
- HTML

TECHNOLOGIES & LIBRARIES

- PostgreSQL
- MongoDB
- NestJS
- ExpressJS
- Angular
- React
- Knex
- Mongoose
- TypeORM

EXPERIENCE

Chaos Solutions Backend Developer Jan 2023 - Jul 2023

I was developing two projects:

- The company's worklog and administration service. I've learnt to use MongoDB, NodeJS and NestJS.
- A NodeJS server for a mobile app used in the pharmaceutical industry. I've learnt ExpressJS and PostgreSQL.

EDUCATION

Nagyasszonyunk Katolikus Gimnázium High School / Graduation 2015 - 2021

University of Szeged Bachelor's Degree in Computer Science 2021 - Present

PROJECTS

Neptun++

<https://github.com/niklierik/neptun-copy>

This app was an assignment for the University's Database Systems Course.

The tech-stack of the app:

- NextJS + React
- NestJS
- NodeJS
- Oracle (this was mandatory for this assignment)

We split up the work with my partner so I would do the backend and he would do the frontend.

HoMM Copy

<https://github.com/niklierik/neptun-copy>

This app was an assignment for the University's Programming I Course.

The project had to recreate the combat system of the famous game Heroes of Might and Magic.

I was already familiar with OOP, Java and Swing writing this app but still learnt new things during development.
